GEOGRAPHY RISK

Germany has the highest churn rate at 32.4% — roughly double France (16.2%) and Spain (16.7%). German customers also hold the highest average balance (\$119,730), so attrition there is disproportionately costly.

AGE & LIFE STAGE

Churn peaks in the 46-55 group at 25.1% and 56-65 at 16.5%, vs only 0.0% for 26-35. Mid-life, higher-balance customers are the prime retention target.

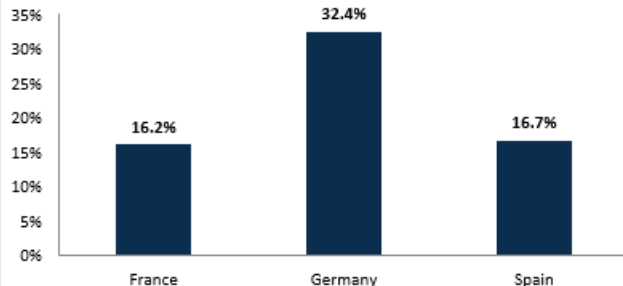

PRODUCT DEPTH

Customers with 2 products churn least (13.8%). One-product customers churn at Churn Rate, while 3-4 product holders show extreme churn (34.7% / 19.9%) — likely forced cross-sell or fee dissatisfaction.

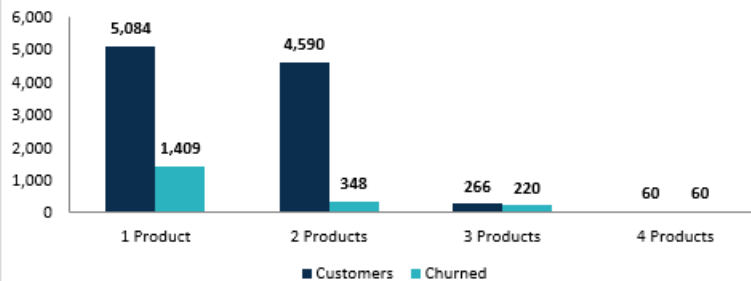

ENGAGEMENT GAP

Inactive members churn at 17.2% vs 20.3% for active members. Re-activation campaigns offer the single largest controllable churn lever. Credit card ownership shows almost no effect (0.0% vs 0.0%).
